Art Unit: 2815

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 are, drawn to a chip device, classified in class 257, subclass 666+.
 - II. Claim 7-8 are, drawn to a method of making a chip device, classified in class 438, subclass 106+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product claimed may be made by another and materially different process whereby the step of using a second temperature may be eliminating and the reflowing process may be formed utilizing only one temperature.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner S.V. Clark whose telephone number is (703) 308-4924.
